wind had in Signature of the Signature o	his project will construct a new Solid Waste facility to serve the residents and visitors of Gilchrist County. The new facility li replace and expand an existing facility which is unable to efficiently process the dramatic increase in waste our county is experienced. The project will allow for safer daily operations while reducing the amount of negative environmental pacts caused by solid waste. Furthermore, we will increase recycling capabilities and offer more services to the area. Decifically, we plan to expand our facility to the neighboring 9.6 acres of county owned land and construct a 10,000 sq ft ansfer station building with a full tunnel design, a 1,500 sq foot scale house, a 5,800 sq ft metal canopy over inbound and antibound scales, a 1,500 sq ft HHW and Mosquito Control building, a designated Aluminum, Metals, Cardboard, Plastics, and Waste and Tire recycling areas. We have experienced an 86.76% increase in solid waste from 2761.44 tons to 10.79 tons since 2012.

a. What specific purpose or goal will be achieved by the funds requested?

The Florida Senate Local Funding Initiative Request Fiscal Year 2023-2024

LFIR # 1842

The specific purpose for the funds being requested is to construct a new Solid Waste transfer facility to serve the residents and visitors of Gilchrist County. The new facility will replace an existing facility which is outdated and unable to process the dramatic increase in waste our county has experienced.

The project will allow for a desperately needed expansion as well as more efficient daily operations while improving the health of our local environment.

b. What activities and services will be provided to meet the intended purpose of these funds?

The services provided will be continued and expanded collection and disposal of Solid Waste, recyclables and Mosquito Control within our county. The funds will allow for a desperately needed new facility and expansion of our current capabilities. Currently, we are underequipped to sustain the volume of solid waste and recyclables. These funds would greatly improve health, safety, and efficiency.

c. What direct services will be provided to citizens by the appropriation project?

Services provided include removal and disposal of solid waste including but not limited to household garbage, construction and debris waste, tires, waste oil, yard waste, leachate, recyclables, toxic roundups. We also provide Mosquito Control. These services are critical to the health and wellness of our community and environment and we are currently incapable of maintaining the ever increasing demand.

d. Who is the target population served by this project? How many individuals are expected to be served?

The general population will be served by this project- we have a county population of 18,360 with over 175,000 annual visitors.

e. What is the expected benefit or outcome of this project? What is the methodology by which this outcome will be measured?

The expected benefit will be increased capacity and efficiency on our already strained Solid Waste facility as well as increased recycling abilities, expanded services to residents and visitors, illegal dumping and littering mitigation, and reduced operations costs. The outcome will be measured by tracking the increase in Solid Waste tonnage, tracking the decrease in operational costs, documenting the increase in recycled goods processed, track and log decrease in illegal dumping and littering and track new and expanded services offered following new facility.

f. What are the suggested penalties that the contracting agency may consider in addition to its standard penalties for failing to meet deliverables or performance measures provided for the contract?

Deliverables/Performance will be measured monthly. If deliverables/performances are not met according to contract, they will be addressed immediately by County staff and the County engineer. If corrections are not successful within a timely manner, funds will be returned.
