North Miami requests \$300,000 to support drainage improvements in the NE 121st Street neighborhood from NE 10th Avenue to NE 11th Court. The project aims to protect a vulnerable North Miami neighborhood from repetitive flood risks as well as growing impacts of climate change. The City proposes to install new drainage to include 400 LF of 18" exfiltration trench to mitigate flooding and improve water quality. More importantly, this project is in a residential community and contributes to the economic self sufficiency of 50 families that will experience fewer instances of property loss and insurance claims due to flooding. The proposed project is SHOVEL READY and the City is prepared to begin construction within 60 days of contract execution, if funding is approved.

14. Program Performance

a. What specific purpose or goal will be achieved by the funds requested?

The City's proposed project strengthens flood mitigation measures in a vulnerable North Miami neighborhood, protecting residents from environmental harm and property loss caused by flooding.

b. What activities and services will be provided to meet the intended purpose of these funds?

The City will install a new drainage system in the residential community.

c. What direct services will be provided to citizens by the appropriation project?

The project directly improves quality of life for residents through improve public infrastructure. Homeownership and safe housing is crucial in providing families with a sense of security and stability. Research shows that adequate housing is linked to increased graduation rates, children's health, and family wealth.

d. Who is the target population served by this project? How many individuals are expected to be served?

The proposed project reduces instances of flooding to 50 households and protects the economic self-sufficiency of these families. The City of North Miami's total population is over 60,000.

e. What is the expected benefit or outcome of this project? What is the methodology by which this outcome will be measured?

The proposed project will significantly reduce flooding and redirect stormwater to the newly installed drainage system. The drainage system will have increased capacity to collect water runoff. Additionally, the project will improve the quality of groundwater, as the new drainage system includes an exfiltration trench to prevent pathogens and other pollutants such as sediment and nutrient from entering the water table.

f. What are the suggested penalties that the contracting agency may consider in addition to its standard penalties for failing to meet deliverables or performance measures provided for the contract?

The City will not be reimbursed for project activities that do not meet the deliverables or performance measures.
